Allowable Subject Matter

Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to an RF tracking system and method which includes a shell for holding a plurality of containers which store a material that interferes with RF communications. Each independent claim identifies the uniquely distinct features "at least one RF tag attached to a first one of the leg extensions and including a memory arrangement storing data relating to at least one of an identity of the shell, an identity of the containers and a material stored in the containers, the tag being situated at a predetermined distance away from the containers to overcome an electromagnetic dampening effect of the material which interferes with RF communications between the tag and an RF scanner". The closest prior art, Chen et al. (US 5,869,820) and Moore (US 6,714,121), disclose conventional RFID tracking methods, either singularly or in combination, fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2632

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Okamura (US 6,870,464) and Moore (US 6,956,538) are cited to show additional RF tracking systems.
